

Far too serious

You're far too serious

All we were doin' was havin' fun,

That's what we agreed

You're far too serious

Not in the market for anyone

How come you picked me

Oh girl, you're in too deep,

You're far too serious

or me

You're far too serious

Turnin' you and me into us

Well that's make believe

You're far too serious

Fixin' when and where, just because

I said one day maybe

Girl you're in too deep

You're far too serious

for me

*Lighten up and we could have a real
good time*

I really think a pinch of salt

Might ease your mind,

Ease your mind

You're far too serious

And just a little bit previous

For the likes of me

You're far too serious

I can't remember me being lost

Or your property

Girl you're in too deep

You're far too serious

For me

I said

Girl you're in too deep

You're far too serious

For me
